The VINCI Energies - Eiffage Énergie Systèmes joint venture wins the contract to implement the electrical infrastructure of Grand Paris Express Line 15 South

- Comprehensive implementation of the line's electrical architecture
- Contract value: €71 million

The Alise joint venture led by VINCI Energies via its subsidiary SDEL Transport Grands Projets, in partnership with Eiffage Énergie Systèmes (50/50), has won the contract to comprehensively implement the electrical architecture of Grand Paris Express Line 15 South.

The €71 million contract covers comprehensive implementation of the 20 kV network electrical architecture from the 10 Enedis supply substations and of electricity distribution in the Line 15 South tunnels, stations and structures to the 250 low-voltage distribution boards.

Within the joint venture, Axians Rail Ile-de-France (VINCI Energies) will also roll out the optical infrastructure of the Line 15 South multi-service data transmission network. Eiffage Énergie Systèmes – Clemessy will provide electrical architecture design and implementation support for the Alise joint venture.

The contract also covers the installations that help ensure passenger, rail tunnel and station safety (lighting, emergency service electrical outlets and telephone system, temperature rise sensors).

The new 33-kilometre metro Line 15 South will connect 22 municipalities in four administrative departments, and will have 18 new stations between Pont de Sèvres and Noisy Champs.

Many challenges in an urban environment

Beyond the technical requirements, the joint venture will be called on to manage complex worksite logistics in a dense urban environment and to meet the 70-month schedule, which includes a large number of interfaces and commissioning operations throughout the project.

Substantial social engagement

The joint venture has made a commitment to provide 2,000 hours of training and 10,000 hours of work integration throughout the project. With respect to the environment, the joint venture plans to implement an ambitious waste treatment policy and an "Environmental Protection Plan" to minimise the impact of its activities throughout the project.

About VINCI

VINCI is a global player in concessions and contracting, employing close to 195,000 people in some 100 countries. We design, finance, build and operate infrastructure and facilities that help improve daily life and mobility for all. Because we believe in all-round performance, above and beyond economic and financial results, we are committed to operating in an environmentally and socially responsible manner. And because our projects are in the public interest, we consider that reaching out to all our stakeholders and engaging in dialogue with them is essential in the

conduct of our business activities. VINCI's goal is to build long-term value in this way for its customers, shareholders, employees and partners, and for society at large. www.vinci.com

About Eiffage

Eiffage, a European leader in building, civil engineering and concessions, operates in construction, property, development, civil engineering, metal, roads, energy systems and concessions. Building on the experience of its more than 65,000 employees, the Group generated revenue of €15 billion in 2017, of which nearly 21% outside France.
